

Question: Regarding the joint investment business, with a ratio of overseas customers and future forecast, could you please provide a comment on them?

Kusakabe: Currently, we execute overseas project finance transactions with institutional investors. There are many transactions that we are implementing as an investor. So, the joint investment business will be developed going forward. Finally, we were able to do one transaction this year, which we joined as the FA, Financial Advisor and we sold that transaction to an overseas investor. We just have made a start only, so we would like to grow or make efforts to grow this area.
